

## REMARKS

A notice has been entered that the previous response was not responsive. These remarks address such notice.

Originally, the species of Figure 13 was selected. The description related to Figure 13 is found on pages 65-66 and 68-70 of the application. Applicant believes that the description on these pages indicates that the claims currently in the application are supported in Figure 13.

As described beginning on page 68, several features of the inventions shown in Figures 13 and 14 are set forth. Sequence number (2) on page 69 describes the use of digitized voice or audio in connection with the embodiment illustrated in Figure 13. Thus, the embodiment of Figure 13 includes the described feature of converting data to digitized voice or audio information. This feature runs through all of the claims remaining in the application.

Thus, each independent claim includes the transmission of voice signals representing the caller-id data. As described in the specification, this allows the identity of the caller to be made available as audio, driving an audio output device. Because this feature is contained in Figure 13, and all independent claims include it, Applicant believes that all claims in the application fall within the scope of the species set forth in Figure 13.

Applicant believes that all claims in the application are now shown to be within the scope of species 13 as originally defined, and respectfully requests examination of same. If the Examiner has any issues or concerns regarding the application, the Examiner is

RESPONSE

requested to contact the attorney for Applicant set forth below, in order to obtain a speedy resolution of such issues.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'K Hill', with a long horizontal flourish extending to the right.
